Our Method

At the heart of our approach lies a profound insight into the human condition, bridging the latest in neuroscience with ground-breaking discoveries in cognitive psychology.

This intersection reveals the key to unlocking our potential, opening our minds, and achieving unparalleled success: **Motivational Intelligence**.

Motivational Intelligence (MQ) is the art of overcoming negative thoughts and self-limiting beliefs to overcome obstacles and achieve goals.

It's a concept rooted in the most pivotal and extensively researched areas of social psychology, earning awards such as a Nobel Prize and being hailed as one of the twentieth century's top ten scientific breakthroughs.

But what truly sets Motivational Intelligence apart is its ability to answer the fundamental questions of 'why?' Why do some individuals excel where others falter?

Why can some adapt effortlessly while others are paralysed by change? Why do some give up at the first sign of challenge, whereas others persevere against all odds?

Success is not solely determined by intelligence quotient (IQ) or emotional quotient (EQ). The real game-changer is a high MQ.

This form of intelligence weaves through every monumental human achievement, every overcome challenge, and every story of resilience.

The stark difference between those who succeed and those who struggle lies in their level of Motivational Intelligence.

Recognised as the third and most impactful level of human Intelligence, MQ is the cornerstone of our methodology at The Power Within Training, empowering you to go beyond your limits and craft a legacy of success.

The Science Behind Motivational Intelligence

We define Motivational Intelligence as “the ability to motivate oneself and others” and we have identified two primary routes for practising Motivational Intelligence.

First, by identifying and managing negative thoughts and self-limiting beliefs. Second, by identifying and managing human needs. To teach Motivational Intelligence to our clients, we integrate the psychological science and neuroscience of motivation into our training programmes.

Our research has found that the psychological phenomenon known as the growth mindset strongly contributes to motivation and success across several outcomes in the workplace. Therefore, teachings of the growth mindset underpin our training programmes. Beyond the benefits of the growth mindset for driving success in the workplace, the growth mindset has been shown to benefit Equity, Diversity, and Inclusion by increasing the comfort with which people of different groups interact.

The latest neuroscientific research converges upon the theory that the brain is a “prediction-making machine”.

As a result, our training programmes combine this research with research on the psychology of motivation so that we can teach our clients how to leverage their subconscious processes to inspire increased motivation in themselves and others.

Scientific research is not just distilled and taught through our training programmes; it is the foundation.

We draw upon the findings from cognitive science and psychological “intervention” research to ensure our clients remember and apply their lessons in practice, making our programmes not just informative but also highly effective.

The Business Growth Academy

Step up your business game with our CITB approved programme, a dynamic journey through six meticulously designed business growth, leadership, and financial management modules.

Tailored for business owners keen to move beyond day-to-day operations, get off the tools, and drive their enterprises towards sustainable growth, this programme is your blueprint for a more profitable and future-proof business.

The focus is on enabling you to step back, work on your business rather than in it, and ignite profitability, paving the way for growth.

Leveraging the latest strategies in business development, we guide you through identifying, adapting, and swiftly applying straightforward yet powerful tools and techniques.

These resources are specially curated for the construction industry, ensuring relevance and impact.

Consider the analogy of building a house on weak foundations: it's only a matter of time before cracks appear, leading to potential collapse or, at best, a costly battle to prevent failure.

This programme aims to avoid such scenarios for your business. By laying solid foundations, you or your business partner can steer your company towards becoming more robust, focused, and profitable.

In essence, the Business Growth Academy offers you the tools to build a sturdy, profitable business structure that stands the test of time, freeing you from the cycle of constant repairs and allowing you to focus on future success.
